***New York State Response to COVID-19 (Executive Order 202.6):***

***Impact on Construction at Buffalo State***

On Friday, March 27, acting on behalf of Governor Andrew Cuomo, the Empire State Development Corporation [directed that all non-essential construction must shut down](#) across New York State. This order generally applies to SUNY projects. The mandate allows that construction may continue only if it would be unsafe to stop, and only to the extent that it would make a construction project safe to shut down.

Buffalo State is currently developing its plan to respond to this mandate, and will keep the campus community informed if changes to construction schedules occur. Please consult the [Daily Bulletin](#) and the campus [Coronavirus Information](#) website for updates.
